CLASS 11 PHYSICS EXCELLENCE PROGRAMME

Student Lecture Planner

CBSE 2026–27 + NEET Foundation

This booklet is your class timetable for Class 11 Physics. Bring it to every lecture. Tick each class after you finish the daily test.

Starts	Tuesday 1 September 2026
Classes	Monday–Saturday • 60 minutes
Week 1	Tuesday 1 September to Saturday 5 September
New topics end	Thursday 24 December 2026
Class 11 complete	Thursday 31 December 2026
Total classes	105 (99 teaching + 6 lock / revision)
After every class	Daily test of 5–10 questions, before the next lecture
Chapter complete	70% on the chapter practice test

How every class works

0–10 min — We correct yesterday's weak daily-test questions.
10–40 min — New concept, diagram and derivation.
40–55 min — Guided numerical and NEET-style items.
55–60 min — Formula recap and today's daily-test instruction.

What you must do

1. Complete the daily test (DT) before the next lecture. It takes 10–15 minutes.
2. On a day with two topic lines, the test covers both topics.
3. Read the matching NCERT section before the next class.
4. Reattempt every wrong numerical within 48 hours.
5. A chapter is complete only after NCERT examples, exercises, formula sheet, practice class, and 70% on the chapter test.
6. Below 70% means extra practice that week before we add a new chapter load.
7. One missed daily test may be recovered on Sunday.

Some days cover two related titles in one hour. Both titles are listed. Come prepared for both.

Chapter map

New theory ends on 24 December. 25–31 December is lock and revision — no new chapter.

Chapter	Lectures	Dates	Days
Mathematical Tools	**L001 – L009**	01–10 Sep	9
Vectors	**L010 – L014**	11–16 Sep	5
Units and Measurements	**L015 – L022**	17–25 Sep	8
Motion in a Straight Line	**L023 – L031**	26 Sep – 06 Oct	9
Motion in a Plane	**L032 – L036**	07–12 Oct	5
Laws of Motion	**L037 – L047**	13–24 Oct	11
Work, Energy and Power	**L048 – L052**	26–30 Oct	5
Centre of Mass and System of Particles	**L053 – L057**	31 Oct – 05 Nov	5
Rotational Motion	**L058 – L066**	06–16 Nov	9
Gravitation	**L067 – L071**	17–21 Nov	5
Mechanical Properties of Solids	**L072 – L073**	23–24 Nov	2
Mechanical Properties of Fluids	**L074 – L078**	25–30 Nov	5
Thermal Properties of Matter	**L079 – L083**	01–05 Dec	5
Kinetic Theory	**L084 – L085**	07–08 Dec	2
Thermodynamics	**L086 – L089**	09–12 Dec	4
Oscillations	**L090 – L094**	14–18 Dec	5
Waves	**L095 – L099**	19–24 Dec	5
Class 11 lock	**L100 – L105**	25–31 Dec	6

If a class is cancelled

Fri 02 Oct 2026 — Possible holiday — if there is no class, these topics move to the next class.
Mon 09 Nov 2026 — Diwali week — attend if class is held; otherwise complete the same topics from the recording / notes.
Tue 10 Nov 2026 — Diwali week — attend if class is held; otherwise complete the same topics from the recording / notes.
Fri 25 Dec 2026 — Christmas — if there is no class, sit the lock paper at home and bring it on 26 Dec.
Thu 31 Dec 2026 — Class 11 Physics complete.

If there is no class on a listed date, the same lecture number and topics move to the next working day. Topics are not dropped.

Lecture calendar

L = lecture number. DT = daily test to be finished before the next class. A star (*) means a possible holiday — see page 2.

Week 1: 01–05 Sep 2026 — Mathematical Tools

L	Date	Chapter	Topics for the class	Type	After class
001	Tue 01 Sep	Mathematical Tools	Trigonometry — ratios, identities, right-triangle problems	Concept	DT-001
002	Wed 02 Sep	Mathematical Tools	Trigonometry — ASTC, radian–degree, height and distance	Concept	DT-002
003	Thu 03 Sep	Mathematical Tools	• Algebra for physics • Binomial expansion	Concept	DT-003
004	Fri 04 Sep	Mathematical Tools	A.P. and G.P.	Concept	DT-004
005	Sat 05 Sep	Mathematical Tools	Graphs — straight line and slope	Concept	DT-005

Week 2: 07–12 Sep 2026 — Mathematical Tools → Vectors

L	Date	Chapter	Topics for the class	Type	After class
006	Mon 07 Sep	Mathematical Tools	Logarithms	Concept	DT-006
007	Tue 08 Sep	Mathematical Tools	• Coordinate geometry I • Coordinate geometry II — parabola and related curves	Concept	DT-007
008	Wed 09 Sep	Mathematical Tools	Differentiation (for v and a)	Concept	DT-008
009	Thu 10 Sep	Mathematical Tools	Mathematical tools — question practice	Practice / test	DT-009
010	Fri 11 Sep	Vectors	Introduction of vector and scalar; types of vectors	Concept	DT-010
011	Sat 12 Sep	Vectors	• Vector addition • Vector subtraction	Concept	DT-011

Week 3: 14–19 Sep 2026 — Vectors → Units and Measurements

L	Date	Chapter	Topics for the class	Type	After class
012	Mon 14 Sep	Vectors	Resolution of vectors; multiplication by a scalar	Concept	DT-012
013	Tue 15 Sep	Vectors	• Scalar product, vector product and projection • Vector product (cross product) in depth	Concept	DT-013
014	Wed 16 Sep	Vectors	Vectors — question practice	Practice / test	DT-014
015	Thu 17 Sep	Units and Measurements	Physical quantities and units	Concept	DT-015
016	Fri 18 Sep	Units and Measurements	Dimensions and dimensional formula	Concept	DT-016
017	Sat 19 Sep	Units and Measurements	Dimensional analysis I	Concept	DT-017

Week 4: 21–26 Sep 2026 — Units and Measurements → Motion in a Straight Line

L	Date	Chapter	Topics for the class	Type	After class
018	Mon 21 Sep	Units and Measurements	• Dimensional analysis II • Dimensional analysis III — uses and limits	Concept	DT-018
019	Tue 22 Sep	Units and Measurements	Significant figures	Concept	DT-019
020	Wed 23 Sep	Units and Measurements	• Errors in measurement I • Errors in measurement II	Concept	DT-020
021	Thu 24 Sep	Units and Measurements	Measuring instruments — Vernier and screw gauge	Concept	DT-021
022	Fri 25 Sep	Units and Measurements	Units and measurements — question practice	Practice / test	DT-022
023	Sat 26 Sep	Motion in a Straight Line	Introduction of mechanics; frame of reference; distance and displacement	Concept	DT-023

Week 5: 28 Sep – 03 Oct 2026 — Motion in a Straight Line

L	Date	Chapter	Topics for the class	Type	After class
024	Mon 28 Sep	Motion in a Straight Line	Average speed and average velocity	Concept	DT-024
025	Tue 29 Sep	Motion in a Straight Line	Instantaneous velocity and its speed	Concept	DT-025
026	Wed 30 Sep	Motion in a Straight Line	• Acceleration • Uniform motion and uniform acceleration	Concept	DT-026
027	Thu 01 Oct	Motion in a Straight Line	• Motion under gravity (free fall) I • Motion under gravity (free fall) II	Concept	DT-027
028	Fri 02 Oct *	Motion in a Straight Line	• Graphs of 1D motion I — x–t • Graphs of 1D motion II — v–t	Concept	DT-028
029	Sat 03 Oct	Motion in a Straight Line	• Variable acceleration I • Variable acceleration II	Concept	DT-029

* Fri 02 Oct 2026: Possible holiday — if there is no class, these topics move to the next class.

Week 6: 05–10 Oct 2026 — Motion in a Straight Line → Motion in a Plane

L	Date	Chapter	Topics for the class	Type	After class
030	Mon 05 Oct	Motion in a Straight Line	• Graphs of 1D motion III — mixed • Graphs of 1D motion IV — mixed	Concept	DT-030
031	Tue 06 Oct	Motion in a Straight Line	Motion in a straight line — question practice	Practice / test	DT-031
032	Wed 07 Oct	Motion in a Plane	• Projectile motion I — level ground • Projectile motion II — equation of trajectory	Concept	DT-032
033	Thu 08 Oct	Motion in a Plane	• Projectile motion III — from a height • Projectile motion IV — numericals	Concept	DT-033
034	Fri 09 Oct	Motion in a Plane	Relative motion	Concept	DT-034
035	Sat 10 Oct	Motion in a Plane	Circular motion I — UCM	Concept	DT-035

Week 7: 12–17 Oct 2026 — Motion in a Plane → Laws of Motion

L	Date	Chapter	Topics for the class	Type	After class
036	Mon 12 Oct	Motion in a Plane	Motion in a plane — question practice	Practice / test	DT-036
037	Tue 13 Oct	Laws of Motion	Force and Newton’s first law	Concept	DT-037
038	Wed 14 Oct	Laws of Motion	• Linear momentum • Newton’s second law	Concept	DT-038
039	Thu 15 Oct	Laws of Motion	Newton’s third law and free-body diagram	Concept	DT-039
040	Fri 16 Oct	Laws of Motion	• Working with Newton’s first law • Working with Newton’s second law	Concept	DT-040
041	Sat 17 Oct	Laws of Motion	• Calculation of acceleration • Spring force, non-inertial feel, rocket propulsion	Concept	DT-041

Week 8: 19–24 Oct 2026 — Laws of Motion

L	Date	Chapter	Topics for the class	Type	After class
042	Mon 19 Oct	Laws of Motion	• Friction — types of friction • Graph between applied force and friction	Concept	DT-042
043	Tue 20 Oct	Laws of Motion	• Angle of friction and angle of repose • Acceleration of a body on a rough surface	Concept	DT-043
044	Wed 21 Oct	Laws of Motion	Dynamics of circular motion I	Concept	DT-044
045	Thu 22 Oct	Laws of Motion	Dynamics of circular motion II	Concept	DT-045
046	Fri 23 Oct	Laws of Motion	Dynamics of circular motion III	Concept	DT-046
047	Sat 24 Oct	Laws of Motion	Laws of motion — question practice	Practice / test	DT-047

Week 9: 26–31 Oct 2026 — Work, Energy and Power → Centre of Mass and System of Particles

L	Date	Chapter	Topics for the class	Type	After class
048	Mon 26 Oct	Work, Energy and Power	Work	Concept	DT-048
049	Tue 27 Oct	Work, Energy and Power	• Energy • Work–energy theorem • Conservative and non-conservative force	Concept	DT-049
050	Wed 28 Oct	Work, Energy and Power	• Potential energy I • Potential energy II — spring	Concept	DT-050
051	Thu 29 Oct	Work, Energy and Power	Equilibrium	Concept	DT-051
052	Fri 30 Oct	Work, Energy and Power	Work, energy and power — question practice	Practice / test	DT-052
053	Sat 31 Oct	Centre of Mass and System of Particles	• Centre of mass I • Centre of mass II — rigid bodies and rod	Concept	DT-053

Week 10: 02–07 Nov 2026 — Centre of Mass and System of Particles → Rotational Motion

L	Date	Chapter	Topics for the class	Type	After class
054	Mon 02 Nov	Centre of Mass and System of Particles	• Collision — head-on I • Collision — head-on II	Concept	DT-054
055	Tue 03 Nov	Centre of Mass and System of Particles	Collision — head-on III — coefficient of restitution	Concept	DT-055
056	Wed 04 Nov	Centre of Mass and System of Particles	Collision — 2D / oblique	Concept	DT-056
057	Thu 05 Nov	Centre of Mass and System of Particles	Centre of mass — question practice	Practice / test	DT-057
058	Fri 06 Nov	Rotational Motion	Introduction; rigid body	Concept	DT-058
059	Sat 07 Nov	Rotational Motion	• Moment of inertia I • Moment of inertia II — standard objects	Concept	DT-059

Week 11: 09–14 Nov 2026 — Rotational Motion

L	Date	Chapter	Topics for the class	Type	After class
060	Mon 09 Nov *	Rotational Motion	Theorems of moment of inertia	Concept	DT-060
061	Tue 10 Nov *	Rotational Motion	Radius of gyration, torque, Newton's laws for rotation	Concept	DT-061
062	Wed 11 Nov	Rotational Motion	Angular momentum	Concept	DT-062
063	Thu 12 Nov	Rotational Motion	• Rotational kinetic energy • Conservation of total mechanical energy (rotation)	Concept	DT-063
064	Fri 13 Nov	Rotational Motion	Rolling motion; rolling on an incline	Concept	DT-064
065	Sat 14 Nov	Rotational Motion	• Comparison of translational and rotational motion I • Comparison of translational and rotational motion II	Concept	DT-065

* Mon 09 Nov 2026: Diwali week — attend if class is held; otherwise complete the same topics from the recording / notes.

* Tue 10 Nov 2026: Diwali week — attend if class is held; otherwise complete the same topics from the recording / notes.

Week 12: 16–21 Nov 2026 — Rotational Motion → Gravitation

L	Date	Chapter	Topics for the class	Type	After class
066	Mon 16 Nov	Rotational Motion	Rotational motion — question practice	Practice / test	DT-066
067	Tue 17 Nov	Gravitation	Law of gravitation	Concept	DT-067
068	Wed 18 Nov	Gravitation	Acceleration due to gravity	Concept	DT-068
069	Thu 19 Nov	Gravitation	Gravitational potential energy and gravitational potential	Concept	DT-069
070	Fri 20 Nov	Gravitation	• Field and potential; escape velocity; satellite motion • Kepler's laws of planetary motion	Concept	DT-070
071	Sat 21 Nov	Gravitation	Gravitation — question practice	Practice / test	DT-071

Week 13: 23–28 Nov 2026 — Mechanical Properties of Solids → Mechanical Properties of Fluids

L	Date	Chapter	Topics for the class	Type	After class
072	Mon 23 Nov	Mechanical Properties of Solids	• Elasticity, stress, strain, Hooke's law • Modulus of elasticity; Young's modulus	Concept	DT-072
073	Tue 24 Nov	Mechanical Properties of Solids	Solids — question practice	Practice / test	DT-073
074	Wed 25 Nov	Mechanical Properties of Fluids	• Introduction of hydrostatics • Pressure • Pascal's law	Concept	DT-074
075	Thu 26 Nov	Mechanical Properties of Fluids	Buoyancy and buoyant force	Concept	DT-075
076	Fri 27 Nov	Mechanical Properties of Fluids	• Hydrodynamics; equation of continuity • Bernoulli's theorem	Concept	DT-076
077	Sat 28 Nov	Mechanical Properties of Fluids	Viscosity and surface tension	Concept	DT-077

Week 14: 30 Nov – 05 Dec 2026 — Mechanical Properties of Fluids → Thermal Properties of Matter

L	Date	Chapter	Topics for the class	Type	After class
078	Mon 30 Nov	Mechanical Properties of Fluids	Fluids — question practice	Practice / test	DT-078
079	Tue 01 Dec	Thermal Properties of Matter	• Thermal expansion • Applications of thermal expansion	Concept	DT-079
080	Wed 02 Dec	Thermal Properties of Matter	Specific heat capacity	Concept	DT-080
081	Thu 03 Dec	Thermal Properties of Matter	Latent heat and calorimetry	Concept	DT-081
082	Fri 04 Dec	Thermal Properties of Matter	Heat transfer — conduction, convection, radiation	Concept	DT-082
083	Sat 05 Dec	Thermal Properties of Matter	Thermal properties — question practice	Practice / test	DT-083

Week 15: 07–12 Dec 2026 — Kinetic Theory → Thermodynamics

L	Date	Chapter	Topics for the class	Type	After class
084	Mon 07 Dec	Kinetic Theory	Ideal gases; real-gas equation	Concept	DT-084
085	Tue 08 Dec	Kinetic Theory	Kinetic theory — question practice	Practice / test	DT-085
086	Wed 09 Dec	Thermodynamics	Introduction; thermal equilibrium; zeroth law; first law	Concept	DT-086
087	Thu 10 Dec	Thermodynamics	Different types of processes	Concept	DT-087
088	Fri 11 Dec	Thermodynamics	Second law; heat engine; Carnot; heat pump; refrigerator	Concept	DT-088
089	Sat 12 Dec	Thermodynamics	Thermodynamics — question practice	Practice / test	DT-089

Week 16: 14–19 Dec 2026 — Oscillations → Waves

L	Date	Chapter	Topics for the class	Type	After class
090	Mon 14 Dec	Oscillations	• Periodic motion and oscillatory motion • Basic terms of oscillatory motion	Concept	DT-090
091	Tue 15 Dec	Oscillations	SHM and equations of SHM	Concept	DT-091
092	Wed 16 Dec	Oscillations	Energy in SHM	Concept	DT-092
093	Thu 17 Dec	Oscillations	Time period of spring–block; simple pendulum	Concept	DT-093
094	Fri 18 Dec	Oscillations	Oscillations — question practice	Practice / test	DT-094
095	Sat 19 Dec	Waves	• Waves and equation of waves • Characteristics of waves	Concept	DT-095

Week 17: 21–26 Dec 2026 — Waves → Class 11 lock

L	Date	Chapter	Topics for the class	Type	After class
096	Mon 21 Dec	Waves	Progressive wave on string; sound waves; speed of sound	Concept	DT-096
097	Tue 22 Dec	Waves	Superposition; reflection and refraction of waves	Concept	DT-097
098	Wed 23 Dec	Waves	Stationary waves — strings, organ pipes, beats	Concept	DT-098
099	Thu 24 Dec	Waves	Waves — question practice	Practice / test	DT-099
100	Fri 25 Dec *	Class 11 lock	Mechanics mixed NEET MCQ — Ch 1–7, every topic represented	Mock test	DT-100
101	Sat 26 Dec	Class 11 lock	Mechanics CBSE written — derivations and numericals	Mock test	DT-101

* Fri 25 Dec 2026: Christmas — if there is no class, sit the lock paper at home and bring it on 26 Dec.

Week 18: 28–31 Dec 2026 — Class 11 lock

L	Date	Chapter	Topics for the class	Type	After class
102	Mon 28 Dec	Class 11 lock	Fluids + thermal + KTG + thermo mixed	Practice / test	DT-102
103	Tue 29 Dec	Class 11 lock	Oscillations + waves mixed	Practice / test	DT-103
104	Wed 30 Dec	Class 11 lock	Full Class 11 NEET mock	Mock test	No daily test
105	Thu 31 Dec *	Class 11 lock	Formula / graph / derivation lock • Class 11 complete	Review	No daily test

* Thu 31 Dec 2026: Class 11 Physics complete.

After 31 December

Class 11 Physics teaching for this programme is complete. January is for school examinations, error-log repair and formula revision. Keep this planner for revision: every topic you were taught is listed by date.
