CLASS 11 PHYSICS EXCELLENCE PROGRAMME

Student Lecture Planner

Monday–Friday • finishes 10 February

This booklet is your class timetable for Class 11 Physics. Bring it to every lecture. Tick each class after you finish the daily test.

Starts	Tuesday 1 September 2026
Classes	Monday–Friday • 60 minutes
Week 1	Tuesday 1 September to Friday 4 September
Saturday	No lecture — daily-test catch-up, NCERT and error log
New topics end	Tuesday 02 February 2027
Class 11 complete	Wednesday 10 February 2027
Total classes	117 (111 teaching + 6 lock / revision)
After every class	Daily test of 5–10 questions, before the next lecture
Chapter complete	70% on the chapter practice test

How every class works

0–10 min — We correct yesterday's weak daily-test questions.
10–40 min — New concept, diagram and derivation.
40–55 min — Guided numerical and NEET-style items.
55–60 min — Formula recap and today's daily-test instruction.

What you must do

1. Complete the daily test (DT) before the next lecture. It takes 10–15 minutes.
2. On a day with two topic lines, the test covers both topics.
3. Read the matching NCERT section before the next class.
4. Reattempt every wrong numerical within 48 hours.
5. A chapter is complete only after NCERT examples, exercises, formula sheet, practice class, and 70% on the chapter test.
6. Below 70% means extra practice that week before we add a new chapter load.
7. One missed daily test may be recovered on Saturday or Sunday.

Some days cover two related titles in one hour. Both titles are listed. Come prepared for both. Saturday is not a class day.

Chapter map

New theory ends on 02 February. 03 February–10 February is lock and revision — no new chapter. Classes run Monday to Friday only.

Chapter	Lectures	Dates	Days
Mathematical Tools	**L001 – L009**	01–11 Sep	9
Vectors	**L010 – L015**	14–21 Sep	6
Units and Measurements	**L016 – L023**	22 Sep – 01 Oct	8
Motion in a Straight Line	**L024 – L033**	02–15 Oct	10
Motion in a Plane	**L034 – L039**	16–23 Oct	6
Laws of Motion	**L040 – L051**	26 Oct – 10 Nov	12
Work, Energy and Power	**L052 – L058**	11–19 Nov	7
Centre of Mass and System of Particles	**L059 – L064**	20–27 Nov	6
Rotational Motion	**L065 – L075**	30 Nov – 14 Dec	11
Gravitation	**L076 – L080**	15–21 Dec	5
Mechanical Properties of Solids	**L081 – L082**	22–23 Dec	2
Mechanical Properties of Fluids	**L083 – L090**	24 Dec – 04 Jan	8
Thermal Properties of Matter	**L091 – L095**	05–11 Jan	5
Kinetic Theory	**L096 – L097**	12–13 Jan	2
Thermodynamics	**L098 – L101**	14–19 Jan	4
Oscillations	**L102 – L106**	20–26 Jan	5
Waves	**L107 – L111**	27 Jan – 02 Feb	5
Class 11 lock	**L112 – L117**	03–10 Feb	6

If a class is cancelled

Fri 02 Oct 2026 — Possible holiday — if there is no class, this topic moves to the next class.
Mon 09 Nov 2026 — Diwali week — attend if class is held; otherwise complete the same topic from the recording / notes.
Tue 10 Nov 2026 — Diwali week — attend if class is held; otherwise complete the same topic from the recording / notes.
Fri 25 Dec 2026 — Christmas — if there is no class, this topic moves to Monday 28 December.
Fri 01 Jan 2027 — New Year — if there is no class, this topic moves to Monday 4 January.
Tue 26 Jan 2027 — Republic Day — if there is no class, this topic moves to 27 January.
Wed 10 Feb 2027 — Class 11 Physics complete.

If there is no class on a listed date, the same lecture number and topics move to the next working day. Topics are not dropped.

Lecture calendar

L = lecture number. DT = daily test to be finished before the next class. A star (*) means a possible holiday — see page 2.

Week 1: 01–04 Sep 2026 — Mathematical Tools

L	Date	Chapter	Topics for the class	Type	After class
001	Tue 01 Sep	Mathematical Tools	Trigonometry — ratios, identities, right-triangle problems	Concept	DT-001
002	Wed 02 Sep	Mathematical Tools	Trigonometry — ASTC, radian–degree, height and distance	Concept	DT-002
003	Thu 03 Sep	Mathematical Tools	• Algebra for physics • Binomial expansion	Concept	DT-003
004	Fri 04 Sep	Mathematical Tools	A.P. and G.P.	Concept	DT-004

Week 2: 07–11 Sep 2026 — Mathematical Tools

L	Date	Chapter	Topics for the class	Type	After class
005	Mon 07 Sep	Mathematical Tools	Graphs — straight line and slope	Concept	DT-005
006	Tue 08 Sep	Mathematical Tools	Logarithms	Concept	DT-006
007	Wed 09 Sep	Mathematical Tools	• Coordinate geometry I • Coordinate geometry II — parabola and related curves	Concept	DT-007
008	Thu 10 Sep	Mathematical Tools	Differentiation (for v and a)	Concept	DT-008
009	Fri 11 Sep	Mathematical Tools	Mathematical tools — question practice	Practice / test	DT-009

Week 3: 14–18 Sep 2026 — Vectors

L	Date	Chapter	Topics for the class	Type	After class
010	Mon 14 Sep	Vectors	Introduction of vector and scalar; types of vectors	Concept	DT-010
011	Tue 15 Sep	Vectors	• Vector addition • Vector subtraction	Concept	DT-011
012	Wed 16 Sep	Vectors	Resolution of vectors; multiplication by a scalar	Concept	DT-012
013	Thu 17 Sep	Vectors	Scalar product, vector product and projection	Concept	DT-013
014	Fri 18 Sep	Vectors	Vector product (cross product) in depth	Concept	DT-014

Week 4: 21–25 Sep 2026 — Vectors → Units and Measurements

L	Date	Chapter	Topics for the class	Type	After class
015	Mon 21 Sep	Vectors	Vectors — question practice	Practice / test	DT-015
016	Tue 22 Sep	Units and Measurements	Physical quantities and units	Concept	DT-016
017	Wed 23 Sep	Units and Measurements	Dimensions and dimensional formula	Concept	DT-017
018	Thu 24 Sep	Units and Measurements	Dimensional analysis I	Concept	DT-018
019	Fri 25 Sep	Units and Measurements	• Dimensional analysis II • Dimensional analysis III — uses and limits	Concept	DT-019

Week 5: 28 Sep – 02 Oct 2026 — Units and Measurements → Motion in a Straight Line

L	Date	Chapter	Topics for the class	Type	After class
020	Mon 28 Sep	Units and Measurements	Significant figures	Concept	DT-020
021	Tue 29 Sep	Units and Measurements	• Errors in measurement I • Errors in measurement II	Concept	DT-021
022	Wed 30 Sep	Units and Measurements	Measuring instruments — Vernier and screw gauge	Concept	DT-022
023	Thu 01 Oct	Units and Measurements	Units and measurements — question practice	Practice / test	DT-023
024	Fri 02 Oct *	Motion in a Straight Line	Introduction of mechanics; frame of reference; distance and displacement	Concept	DT-024

* Fri 02 Oct 2026: Possible holiday — if there is no class, this topic moves to the next class.

Week 6: 05–09 Oct 2026 — Motion in a Straight Line

L	Date	Chapter	Topics for the class	Type	After class
025	Mon 05 Oct	Motion in a Straight Line	Average speed and average velocity	Concept	DT-025
026	Tue 06 Oct	Motion in a Straight Line	Instantaneous velocity and its speed	Concept	DT-026
027	Wed 07 Oct	Motion in a Straight Line	• Acceleration • Uniform motion and uniform acceleration	Concept	DT-027
028	Thu 08 Oct	Motion in a Straight Line	• Motion under gravity (free fall) I • Motion under gravity (free fall) II	Concept	DT-028
029	Fri 09 Oct	Motion in a Straight Line	Graphs of 1D motion I — x–t	Concept	DT-029

Week 7: 12–16 Oct 2026 — Motion in a Straight Line → Motion in a Plane

L	Date	Chapter	Topics for the class	Type	After class
030	Mon 12 Oct	Motion in a Straight Line	Graphs of 1D motion II — v–t	Concept	DT-030
031	Tue 13 Oct	Motion in a Straight Line	• Variable acceleration I • Variable acceleration II	Concept	DT-031
032	Wed 14 Oct	Motion in a Straight Line	• Graphs of 1D motion III — mixed • Graphs of 1D motion IV — mixed	Concept	DT-032
033	Thu 15 Oct	Motion in a Straight Line	Motion in a straight line — question practice	Practice / test	DT-033
034	Fri 16 Oct	Motion in a Plane	Projectile motion I — level ground	Concept	DT-034

Week 8: 19–23 Oct 2026 — Motion in a Plane

L	Date	Chapter	Topics for the class	Type	After class
035	Mon 19 Oct	Motion in a Plane	Projectile motion II — equation of trajectory	Concept	DT-035
036	Tue 20 Oct	Motion in a Plane	• Projectile motion III — from a height • Projectile motion IV — numericals	Concept	DT-036
037	Wed 21 Oct	Motion in a Plane	Relative motion	Concept	DT-037
038	Thu 22 Oct	Motion in a Plane	Circular motion I — UCM	Concept	DT-038
039	Fri 23 Oct	Motion in a Plane	Motion in a plane — question practice	Practice / test	DT-039

Week 9: 26–30 Oct 2026 — Laws of Motion

L	Date	Chapter	Topics for the class	Type	After class
040	Mon 26 Oct	Laws of Motion	Force and Newton’s first law	Concept	DT-040
041	Tue 27 Oct	Laws of Motion	• Linear momentum • Newton’s second law	Concept	DT-041
042	Wed 28 Oct	Laws of Motion	Newton’s third law and free-body diagram	Concept	DT-042
043	Thu 29 Oct	Laws of Motion	• Working with Newton’s first law • Working with Newton’s second law	Concept	DT-043
044	Fri 30 Oct	Laws of Motion	Calculation of acceleration	Concept	DT-044

Week 10: 02–06 Nov 2026 — Laws of Motion

L	Date	Chapter	Topics for the class	Type	After class
045	Mon 02 Nov	Laws of Motion	Spring force, non-inertial feel, rocket propulsion	Concept	DT-045
046	Tue 03 Nov	Laws of Motion	• Friction — types of friction • Graph between applied force and friction	Concept	DT-046
047	Wed 04 Nov	Laws of Motion	• Angle of friction and angle of repose • Acceleration of a body on a rough surface	Concept	DT-047
048	Thu 05 Nov	Laws of Motion	Dynamics of circular motion I	Concept	DT-048
049	Fri 06 Nov	Laws of Motion	Dynamics of circular motion II	Concept	DT-049

Week 11: 09–13 Nov 2026 — Laws of Motion → Work, Energy and Power

L	Date	Chapter	Topics for the class	Type	After class
050	Mon 09 Nov *	Laws of Motion	Dynamics of circular motion III	Concept	DT-050
051	Tue 10 Nov *	Laws of Motion	Laws of motion — question practice	Practice / test	DT-051
052	Wed 11 Nov	Work, Energy and Power	Work	Concept	DT-052
053	Thu 12 Nov	Work, Energy and Power	Energy	Concept	DT-053
054	Fri 13 Nov	Work, Energy and Power	Work–energy theorem	Concept	DT-054

* Mon 09 Nov 2026: Diwali week — attend if class is held; otherwise complete the same topic from the recording / notes.

* Tue 10 Nov 2026: Diwali week — attend if class is held; otherwise complete the same topic from the recording / notes.

Week 12: 16–20 Nov 2026 — Work, Energy and Power → Centre of Mass and System of Particles

L	Date	Chapter	Topics for the class	Type	After class
055	Mon 16 Nov	Work, Energy and Power	Conservative and non-conservative force	Concept	DT-055
056	Tue 17 Nov	Work, Energy and Power	• Potential energy I • Potential energy II — spring	Concept	DT-056
057	Wed 18 Nov	Work, Energy and Power	Equilibrium	Concept	DT-057
058	Thu 19 Nov	Work, Energy and Power	Work, energy and power — question practice	Practice / test	DT-058
059	Fri 20 Nov	Centre of Mass and System of Particles	• Centre of mass I • Centre of mass II — rigid bodies and rod	Concept	DT-059

Week 13: 23–27 Nov 2026 — Centre of Mass and System of Particles

L	Date	Chapter	Topics for the class	Type	After class
060	Mon 23 Nov	Centre of Mass and System of Particles	Collision — head-on I	Concept	DT-060
061	Tue 24 Nov	Centre of Mass and System of Particles	Collision — head-on II	Concept	DT-061
062	Wed 25 Nov	Centre of Mass and System of Particles	Collision — head-on III — coefficient of restitution	Concept	DT-062
063	Thu 26 Nov	Centre of Mass and System of Particles	Collision — 2D / oblique	Concept	DT-063
064	Fri 27 Nov	Centre of Mass and System of Particles	Centre of mass — question practice	Practice / test	DT-064

Week 14: 30 Nov – 04 Dec 2026 — Rotational Motion

L	Date	Chapter	Topics for the class	Type	After class
065	Mon 30 Nov	Rotational Motion	Introduction; rigid body	Concept	DT-065
066	Tue 01 Dec	Rotational Motion	Moment of inertia I	Concept	DT-066
067	Wed 02 Dec	Rotational Motion	Moment of inertia II — standard objects	Concept	DT-067
068	Thu 03 Dec	Rotational Motion	Theorems of moment of inertia	Concept	DT-068
069	Fri 04 Dec	Rotational Motion	Radius of gyration, torque, Newton's laws for rotation	Concept	DT-069

Week 15: 07–11 Dec 2026 — Rotational Motion

L	Date	Chapter	Topics for the class	Type	After class
070	Mon 07 Dec	Rotational Motion	Angular momentum	Concept	DT-070
071	Tue 08 Dec	Rotational Motion	Rotational kinetic energy	Concept	DT-071
072	Wed 09 Dec	Rotational Motion	Conservation of total mechanical energy (rotation)	Concept	DT-072
073	Thu 10 Dec	Rotational Motion	Rolling motion; rolling on an incline	Concept	DT-073
074	Fri 11 Dec	Rotational Motion	• Comparison of translational and rotational motion I • Comparison of translational and rotational motion II	Concept	DT-074

Week 16: 14–18 Dec 2026 — Rotational Motion → Gravitation

L	Date	Chapter	Topics for the class	Type	After class
075	Mon 14 Dec	Rotational Motion	Rotational motion — question practice	Practice / test	DT-075
076	Tue 15 Dec	Gravitation	Law of gravitation	Concept	DT-076
077	Wed 16 Dec	Gravitation	Acceleration due to gravity	Concept	DT-077
078	Thu 17 Dec	Gravitation	Gravitational potential energy and gravitational potential	Concept	DT-078
079	Fri 18 Dec	Gravitation	• Field and potential; escape velocity; satellite motion • Kepler's laws of planetary motion	Concept	DT-079

Week 17: 21–25 Dec 2026 — Gravitation → Mechanical Properties of Fluids

L	Date	Chapter	Topics for the class	Type	After class
080	Mon 21 Dec	Gravitation	Gravitation — question practice	Practice / test	DT-080
081	Tue 22 Dec	Mechanical Properties of Solids	• Elasticity, stress, strain, Hooke's law • Modulus of elasticity; Young's modulus	Concept	DT-081
082	Wed 23 Dec	Mechanical Properties of Solids	Solids — question practice	Practice / test	DT-082
083	Thu 24 Dec	Mechanical Properties of Fluids	Introduction of hydrostatics	Concept	DT-083
084	Fri 25 Dec *	Mechanical Properties of Fluids	Pressure	Concept	DT-084

* Fri 25 Dec 2026: Christmas — if there is no class, this topic moves to Monday 28 December.

Week 18: 28 Dec – 01 Jan 2027 — Mechanical Properties of Fluids

L	Date	Chapter	Topics for the class	Type	After class
085	Mon 28 Dec	Mechanical Properties of Fluids	Pascal's law	Concept	DT-085
086	Tue 29 Dec	Mechanical Properties of Fluids	Buoyancy and buoyant force	Concept	DT-086
087	Wed 30 Dec	Mechanical Properties of Fluids	Hydrodynamics; equation of continuity	Concept	DT-087
088	Thu 31 Dec	Mechanical Properties of Fluids	Bernoulli's theorem	Concept	DT-088
089	Fri 01 Jan 2027 *	Mechanical Properties of Fluids	Viscosity and surface tension	Concept	DT-089

* Fri 01 Jan 2027: New Year — if there is no class, this topic moves to Monday 4 January.

Week 19: 04–08 Jan 2027 — Mechanical Properties of Fluids → Thermal Properties of Matter

L	Date	Chapter	Topics for the class	Type	After class
090	Mon 04 Jan 2027	Mechanical Properties of Fluids	Fluids — question practice	Practice / test	DT-090
091	Tue 05 Jan 2027	Thermal Properties of Matter	• Thermal expansion • Applications of thermal expansion	Concept	DT-091
092	Wed 06 Jan 2027	Thermal Properties of Matter	Specific heat capacity	Concept	DT-092
093	Thu 07 Jan 2027	Thermal Properties of Matter	Latent heat and calorimetry	Concept	DT-093
094	Fri 08 Jan 2027	Thermal Properties of Matter	Heat transfer — conduction, convection, radiation	Concept	DT-094

Week 20: 11–15 Jan 2027 — Thermal Properties of Matter → Thermodynamics

L	Date	Chapter	Topics for the class	Type	After class
095	Mon 11 Jan 2027	Thermal Properties of Matter	Thermal properties — question practice	Practice / test	DT-095
096	Tue 12 Jan 2027	Kinetic Theory	Ideal gases; real-gas equation	Concept	DT-096
097	Wed 13 Jan 2027	Kinetic Theory	Kinetic theory — question practice	Practice / test	DT-097
098	Thu 14 Jan 2027	Thermodynamics	Introduction; thermal equilibrium; zeroth law; first law	Concept	DT-098
099	Fri 15 Jan 2027	Thermodynamics	Different types of processes	Concept	DT-099

Week 21: 18–22 Jan 2027 — Thermodynamics → Oscillations

L	Date	Chapter	Topics for the class	Type	After class
100	Mon 18 Jan 2027	Thermodynamics	Second law; heat engine; Carnot; heat pump; refrigerator	Concept	DT-100
101	Tue 19 Jan 2027	Thermodynamics	Thermodynamics — question practice	Practice / test	DT-101
102	Wed 20 Jan 2027	Oscillations	• Periodic motion and oscillatory motion • Basic terms of oscillatory motion	Concept	DT-102
103	Thu 21 Jan 2027	Oscillations	SHM and equations of SHM	Concept	DT-103
104	Fri 22 Jan 2027	Oscillations	Energy in SHM	Concept	DT-104

Week 22: 25–29 Jan 2027 — Oscillations → Waves

L	Date	Chapter	Topics for the class	Type	After class
105	Mon 25 Jan 2027	Oscillations	Time period of spring–block; simple pendulum	Concept	DT-105
106	Tue 26 Jan 2027 *	Oscillations	Oscillations — question practice	Practice / test	DT-106
107	Wed 27 Jan 2027	Waves	• Waves and equation of waves • Characteristics of waves	Concept	DT-107
108	Thu 28 Jan 2027	Waves	Progressive wave on string; sound waves; speed of sound	Concept	DT-108
109	Fri 29 Jan 2027	Waves	Superposition; reflection and refraction of waves	Concept	DT-109

* Tue 26 Jan 2027: Republic Day — if there is no class, this topic moves to 27 January.

Week 23: 01–05 Feb 2027 — Waves → Class 11 lock

L	Date	Chapter	Topics for the class	Type	After class
110	Mon 01 Feb 2027	Waves	Stationary waves — strings, organ pipes, beats	Concept	DT-110
111	Tue 02 Feb 2027	Waves	Waves — question practice	Practice / test	DT-111
112	Wed 03 Feb 2027	Class 11 lock	Mechanics mixed NEET MCQ — kinematics to rotation, every topic represented	Mock test	DT-112
113	Thu 04 Feb 2027	Class 11 lock	Mechanics CBSE written — derivations and numericals	Mock test	DT-113
114	Fri 05 Feb 2027	Class 11 lock	Gravitation + solids + fluids mixed	Practice / test	DT-114

Week 24: 08–10 Feb 2027 — Class 11 lock

L	Date	Chapter	Topics for the class	Type	After class
115	Mon 08 Feb 2027	Class 11 lock	Thermal + KTG + thermodynamics mixed	Practice / test	DT-115
116	Tue 09 Feb 2027	Class 11 lock	Oscillations + waves mixed • Full Class 11 NEET mock	Mock test	No daily test
117	Wed 10 Feb 2027 *	Class 11 lock	Formula / graph / derivation lock • Class 11 complete	Review	No daily test

* Wed 10 Feb 2027: Class 11 Physics complete.

After 10 February

Class 11 Physics teaching for this programme is complete. Mid-February onward is for school examinations, error-log repair and formula revision. Keep this planner for revision: every topic you were taught is listed by date.
